Hon. Ron Schuler
Minister of Infrastructure Province of Manitoba
Room 203
Legislative Building
450 Broadway
Winnipeg, MB R3C 0V8

Minister Schuler,

I hope this finds you well.

I'm writing you with regards to a concern that has been raised in our community pertaining to provincial infrastructure and roads.

In the interest of full disclosure, I am a resident of the University Ward in the City of Brandon, and am currently seeking election to represent the ward.

Throughout my campaign I have received a request from a number of constituents to look at the safety of a particular intersection in our community. The corner of McDiarmid Drive and Victoria Ave. (also known as Provincial Hwy. 1A). This crossing has increasingly become a safety risk for residents as vehicles have a tough time knowing for certain if residents are crossing as it is on a route that is a thoroughfare. The intersection is adjacent to a number of local restaurant as well as two schools within a close proximity. Currently the only traffic control device is a painted crosswalk which has a difficult entry points on both sides (due to what could be considered blind spot pedestrian entries into the intersection).

I wanted to bring this to your attention prior to making a statement about it publically regarding future requests on the need for a lighted pedestrian crosswalk or traffic control device. I felt it proper to make your office aware prior to any declaration of my intentions, should I be successful in securing the seat as the councillor for the University Ward.

I welcome any questions you may have with regards to this, and thank you for taking the time to address my letter.

Kindest Regards,

Shaun G. Cameron

c.c. – Scott Sinclair, Acting Deputy Minister
Reg Helwer, MLA, Brandon West
Rod Sage, City Manager, City of Brandon
